FOR IMMEDIATE RELEASE

LABORATORIES RECEIVE ACIL SEAL OF EXCELLENCE AWARD

WASHINGTON, DC, OCTOBER 11, 2004—The American Council of Independent Laboratories (ACIL) announces the Seal of Excellence Award recipients for 2004. The ACIL Seal of Excellence Awards were presented at the ACIL Meeting in Orlando, FL, on October 11, 2004, by the chairman of the ACIL Environmental Sciences Section, Robert Wyeth of Severn Trent Laboratories. Seventy two (72) laboratories received the award this year.

This program provides laboratory data users with a mechanism for evaluating environmental testing laboratories. Participants are committed to ensuring the integrity of data, meeting customers' quality needs and setting the standards of performance for the testing laboratory industry. No other environmental certification program ranks participating laboratories' 12 months of Proficiency Testing study rounds. No other evaluation program ranks customer responses to satisfaction with services and requires the laboratory management to commit to a data integrity program.

The following laboratories, presented alphabetically, have demonstrated their commitment to quality and customer service by participating in the ACIL Seal of Excellence program:

An environmental testing laboratory that wants to be recognized as a participating laboratory must submit 12 months of Proficiency Testing (PT) scores, if available, and distribute satisfaction surveys to their customers and maintain proof of an annual ethics training program and an early detection system for questionable analytical practices, submit a signed code of ethics.

The Seal of Excellence participants in 2004 demonstrated an average Proficiency Testing score of 96.9%, average timeliness of 3.3 out of a possible 4.0 and an overall customer satisfaction score of 3.6 out of a possible 4.0

Special Recognition Awards were presented, again in alphabetical order for each category, to the following Top Ten Laboratories in the categories identified. The Timeliness and Overall Customer Satisfaction recognitions are based on the responses from the client surveys.
